- 3.PDO PHP Extension
- 4.Mbstring PHP Extension
- 5.GD PHP Extension
- 6.Fileinfo PHP Extension

Installation

How to install Spring Investment in Localhost?

See this video for localhost installation system

If you want to install on localhost, you need to download XAMPP Software
[Download from here](#)

you can also see how to install xampp
[how to install xampp](#)

After installation, you can use Spring Investment without Internet. We suggest you use XAMPP for localhost. You can use other solutions like WAMP, MAMP etc. as well and installation process for all of them are same.

1. Go to the XAMPP Control Panel & start the Apache & Mysql

2. Create a folder in htdocs folder inside your XAMPP installation

3. Now copy the zip folder you downloaded from Codecanyon to htdocs folder and unzip it there

4. Create a database from <http://localhost/phpmyadmin/>

5. Now search in browser <http://localhost/myfolder> and you will get auto easy installer

6. check all and go next

7. Now set permission and next

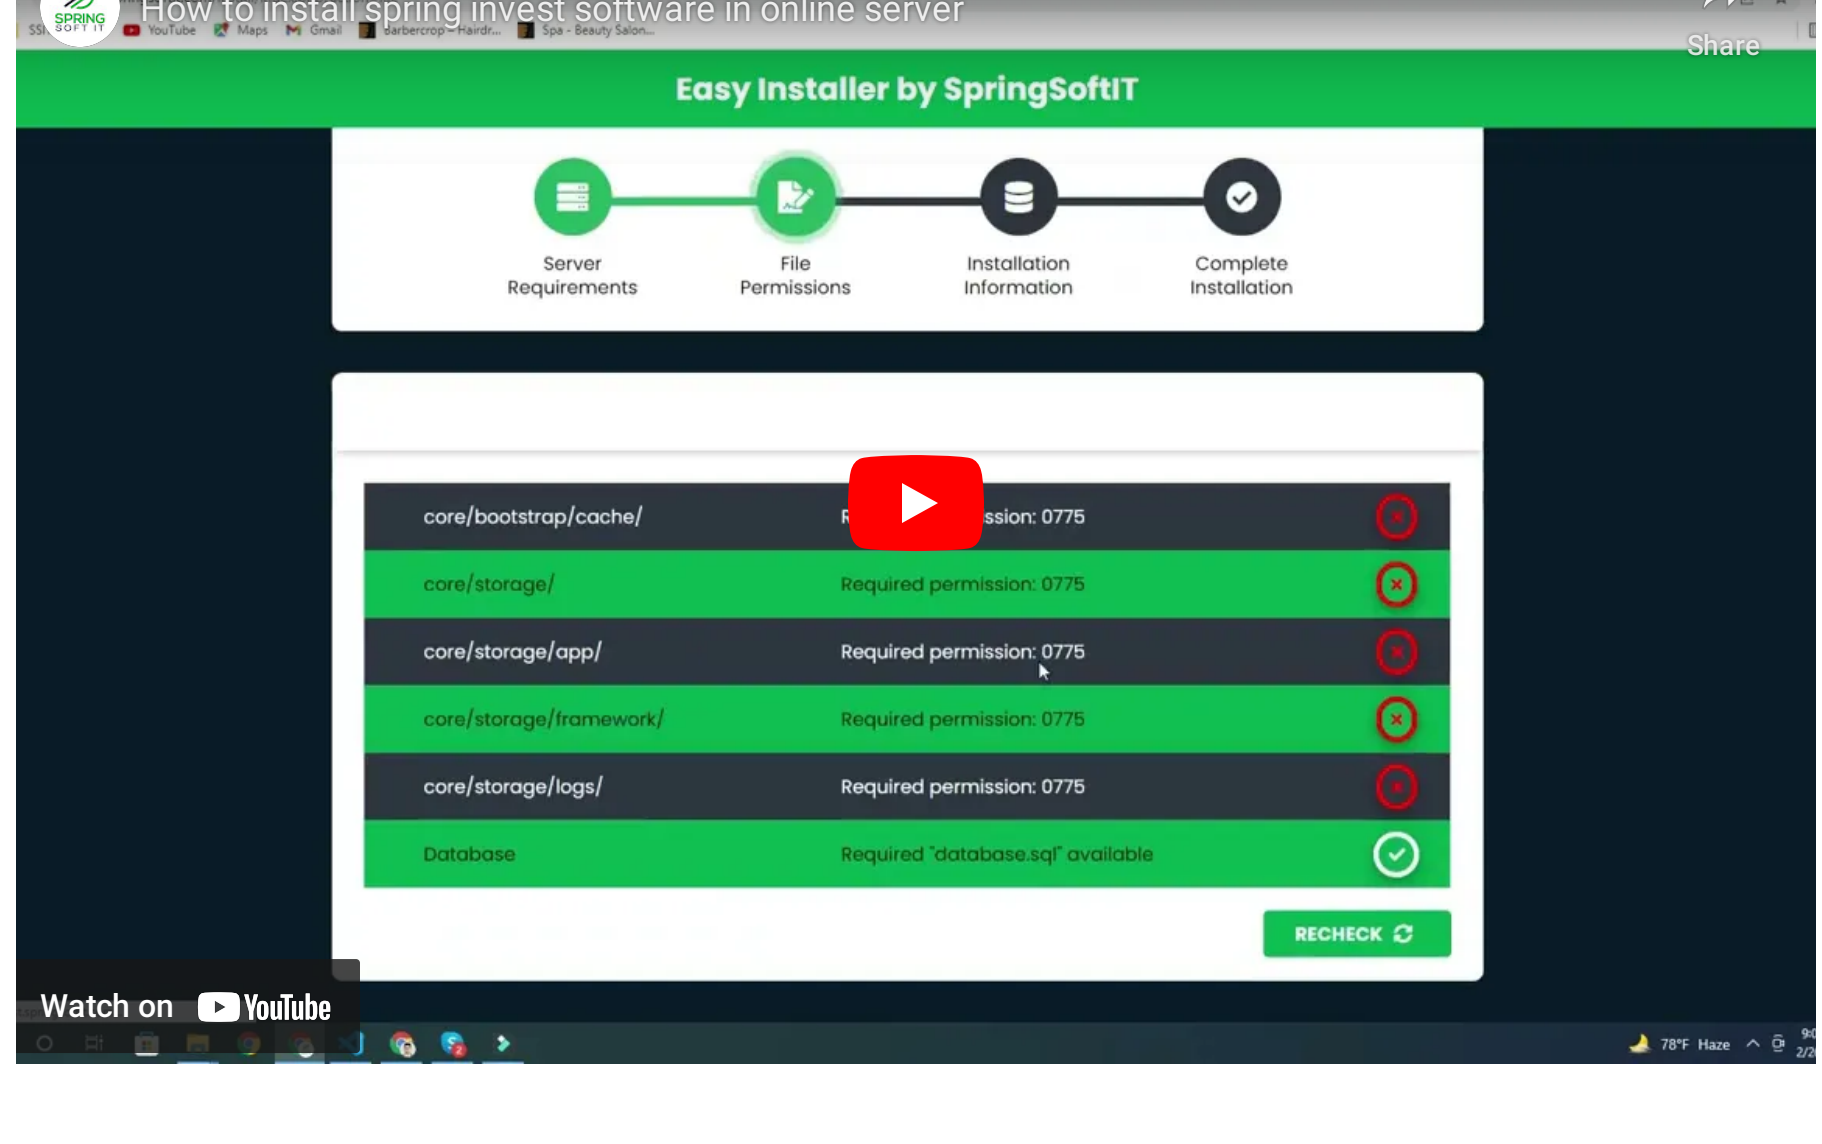

8. should fill the database info , for local host you need to blank password filled and user feild will be "root" name after that set your software admin username , password & admin email

9. Installation complete

BOOM! Done

How to install Spring Investment in Online Hosting ?

See this video for installation

Admin Login credentials
